

OneSpace Collaboration

OneSpace Success

Prove the value of online design communication

OneSpace Success is a CoCreate program that lets you quickly prove the benefits of CoCreate's OneSpace Collaboration software to your organization, without the commitment of a full application installation.

This low-risk short-term program couples CoCreate's consultants and software with your design team to demonstrate the benefits of OneSpace Collaboration to one of your projects. We ensure your success because CoCreate:

- Manages deployment of the OneSpace Collaboration software.
- Documents the ROI of Collaboration to your project.
- Manages and hosts the Collaboration software and hardware.
- And much more.

Adopting new enterprise software can be expensive and risky. Just ask anyone who has dedicated a lot of time and resources to deploy a product – only to find it didn't do what the vendor promised. That's why CoCreate developed **OneSpace Success**, an innovative program that ensures you get all the value of our **OneSpace Collaboration** product, with a fraction of the risk. (If you're not familiar with OneSpace Collaboration, ask your CoCreate representative or see our Web site at www.cocreate.com for more information.)

Here's how **Success** works:

1. Together with you, we identify a project in your organization that will benefit from Collaboration. Ideally, this is a project that highlights design communication problems that are typical to your organization.
2. CoCreate provides and **hosts** all Collaboration software. That means we manage all the server software and hardware. Usually, your project members do little more than install a small Internet plug-in on their desktop, thus minimizing the impact on your IT department.

Take the first step toward enjoying the benefits of collaboration applied to your engineering design processes with OneSpace Success.

3. CoCreate assigns a consultant to the project who ensures you have all the tools, knowledge, and support you need to use the software optimally.
4. When the project is complete, your CoCreate consultant provides you with an **individualized report** outlining the return on investment you enjoyed by using OneSpace Collaboration on your project.

The program is

- Customized, scalable and designed around your business objectives
- Managed by a dedicated CoCreate Professional Services team member
- Short. Typically the 1-2 months it takes to complete a project.
- Secure and reliable with an infrastructure that includes Internet connectivity, firewall crossing, and application resources
- Available 24/7

OneSpace Success

Prove the value of online design communication

Benefits

- Fast deployment, often we can have the software ready to use within a day.
- Documented results.
- A full suite of CoCreate's browser-based integrated collaboration applications available to your entire development team and supply chain.
- Highly secure and reliable service.
- Full support for heterogeneous environments, supporting all popular operating systems, Internet connections, and CAD systems.
- Reduced risk and heightened design team participation.
- Most importantly, better project results. Because with OneSpace Collaboration engineers easily incorporate new ideas and feedback into their designs, creating more innovative products with fewer ECOs.

Features

- CoCreate deploys, hosts, and supports software installation.
- Consultant provides assistance throughout project.
- Documented ROI at project end.

Minimum System Requirements

- Internet Explorer v5.0 or greater
- Netscape v4.7 or greater
- Internet connectivity of 56k. (Optimum performance is dependant on higher connectivity)
- Win9x, 2000, HP-UX, Sun, AIX, Mac
